TUTORIALS

Richard A. Wachnik, CHAIR

---

international reliability physics symposium

THE RENO HILTON
RENO, NEVADA
MARCH 30-APRIL 2, 1998
(Tutorials—March 30th)

TABLE OF CONTENTS

Section

Topic 1. RECENT ADVANCES IN SILICON DEVICE RELIABILITY
P. Fang, J. Tao, and M. Song, Advanced Micro Devices (1s.1–2,1.1–38) 1

Topic 2. SCANNING PROBE MICROSCOPY FOR IC ANALYSIS 2
Introduction to Scanning Probe Microscopy Techniques
Y. Strausser, Digital Instruments 2a.1–26
Tutorial on Scanning Thermal Microscopy
A. Majumdar, University of California, Berkeley 2b.1–16
Scanning Capacitance Microscopy
C. Williams, University of Utah 2c.1–37
Voltage and Current Contrast Imaging
W. Mertin, University of Duisburg 2d.s.1–6, 2d.1–14

Topic 3. NITRIDED OXIDES IN CMOS TECHNOLOGY:
PAST, PRESENT, AND FUTURE
B. Maiti, Motorola APRDL (3.1–50) 3

Topic 4. SURVEY OF MEMS PROCESSES AND FAILURE MECHANISMS 4
Survey of MEMS Processes
W. Tang, Jet Propulsion Laboratory 4a.1–41
Survey of MEMS Failure Mechanisms
C. Muhlstein and S. Brown, Failure Analysis Associates 4b.1–17

Topic 5. REVIEW OF RECENT PUBLICATIONS RELATED TO RELIABILITY FOR BOTH Al(Cu) AND Cu BASED INTERCONNECT SYSTEMS
M. Small, Martin Small Associates (5.1–26) 5

Topic 6. DIELECTRIC RELIABILITY PHYSICS USING SCANNING PROBE MICROSCOPY
R. Ludeke, IBM T.J Watson Research Center and
H. Wen, IBM Austin Research Center (6.1–18) 6

Topic 7. AN OVERVIEW OF IC FAILURE ANALYSIS
T. Barrette, Gatefield Corp. and
J. Hidy and K. Weaver, LSI Logic Inc. (7.1–33) 7

Topic 8. THERMAL EFFECTS IN INTERCONNECTS
W. Hunter and W.-Y. Shih, Texas Instruments and
K. Banerjee, University of California, Berkeley (8.1–94) 8

Topic 9. FLIP CHIP AND BALL GRID ARRAY PACKAGING
R. Master, Advanced Micro Devices (9.1–56) 9

Topic 10. HOT CARRIER DEGRADATION IN SUB-MICRON CMOS TECHNOLOGIES: PROBLEMS AND POSSIBLE SOLUTIONS
R. Bellens, Alcatel Telecom (10s.1–3, 10.1–60) 10
