TUTORIALS

Edward I. Cole, Jr., CHAIR

international reliability physics symposium

FAIRMONT HOTEL
SAN JOSE, CALIFORNIA
APRIL 10- 13, 2000
(Tutorials—April 10th)

TABLE OF CONTENTS

Section

Topic 1. THIN GATE OXIDE RELIABILITY: PAST AND PRESENT TRENDS IN CHARACTERIZATION, PHYSICAL MODELING, AND ASSESSMENT
J.S. Suehle and E.M. Vogel, NIST (1.1–52) 1

Topic 2. LOW-DIELECTRIC CONSTANT MATERIALS FOR COPPER INTERCONNECTS
Kelly J. Taylor, Texas Instruments, Inc. (2.1–35) 2

Topic 3. RELIABILITY CONSIDERATIONS FOR COPPER METALLIZATIONS IN ULSI CIRCUITS
Timothy D. Sullivan and Anthony Stamper, IBM Microelectronics (3.1–40) 3

Topic 4. HOT CARRIER RELIABILITY FOR LOGIC AND MEMORY TECHNOLOGIES
Peng Fang, AMD (4.1–37) 4

Topic 5. ASIC DESIGN FOR SAFETY-CRITICAL APPLICATIONS
T. Ambler, University of Texas Austin (5.1–18) 5

Topic 6. FOCUSED ION BEAM TECHNOLOGY AND APPLICATIONS TO MICROELECTRONICS
M. Abramo, IBM Microelectronics and
A. Campbell, Sandia National Laboratories (6.1–66) 6

Topic 7. A LITERATURE REVIEW OF WET ETCHES FOR THE FA OF SEMICONDUCTOR DEVICES
T. Warren Lee, Varian, Inc. (7.1–28) 7

Topic 8. ANALYTICAL CHALLENGES IN PACKAGING AND ASSEMBLY
G. Samuelson, R. Dias, D. Goyal, and S. Tandon, Intel and
T. Moore and C. Hartfield, Texas Instruments (8.1–30) 8

Topic 9. ANALYSIS OF VARIOUS Cu-LOW K DIELECTRIC MATERIALS TO DETERMINE A VIABLE CANDIDATE FOR ADVANCED INTERCONNECT TECHNOLOGY
Sang U. Kim, Consultant (9.1–25) 9

Topic 10. THERMAL DEFORMATION AND INTERFACIAL ADHESION IN AREA-ARRAY PACKAGES FOR Cu/LOW-k CHIPS
P. S. Ho, University of Texas (10.1–26) 10

Topic 11. PRODUCT RELIABILITY ASSESSMENT AND QUALIFICATION METHODOLOGIES: CURRENT PRACTICES AND FUTURE TRENDS
Nicholas "Nick" Lycoudes, Motorola (11.1–26) 11
